Mesh Entire Home with Seamless WiFi and D-Link Mesh Solution

D-Link, one of the world leading networking company, has been continuously enhance our Wi-Fi devices with the latest Wi-Fi technology together with the security enhancement and best Wi-Fi using experience to our customer. With the explosion in popularity of smart home devices and intensive streaming media services, whole-house Wi-Fi coverage has become a must. Many of the latest wireless routers can provide strong coverage to most rooms of a typical medium-size house, but larger homes and dwellings with dense walls, multiple floors, metal and concrete substructures, and other structural impediments may require additional components to bring Wi-Fi to areas that the router can't reach.

D-Link, the first networking company that introducing the COVR Mesh Wi-Fi System to consumer market. D-Link COVR Mesh Wi-Fi System is Designed to blanket your home with wireless coverage, Wi-Fi systems are a hybrid of sorts, made up of several networking components. There's a main router that connects directly to your modem, and a series of satellite modules, or nodes, that you place throughout your house. They are all part of a single wireless network and share the same SSID and password. Each node serves as a hop point for other nodes in the system. This helps the nodes farthest from the router to deliver a strong Wi-Fi signal as they are talking to other nodes and at the same time allow user to roam from one point to another point without Wi-Fi disconnection and still give user a "full bar" seamless surfing experience.

Industry-Certified Mesh Standard

D-Link's Wi-Fi Mesh allows you to easily increase your home Wi-Fi coverage. Simply add Mesh Wi-Fi extenders around your home to create one seamless and reliable Wi-Fi network that allows you to move around your home without any glitches.

Mesh for Everyone

Introducing the COVR-1100 AC1200 Dual-Band Mesh Wi-Fi Router, the mesh Wi-Fi solution that blankets your home in stable, consistent, and truly seamless Wi-Fi. Wi-Fi that fits everyone's needs.

Full Mesh Wi-Fi coverage.

D-Link's Wi-Fi Mesh allows you to easily increase your home Wi-Fi coverage. Simply add Mesh Wi-Fi extenders around your home to create one seamless and reliable Wi-Fi network that allows you to move around your home without any glitches.

Meet the COVR AX1800 Dual Band Whole Home Mesh Wi-Fi 6 System

COVR-X1870 (2-PACK)

COVR AX1800 Whole Home Mesh Wi-Fi 6 System

The COVR-X1870 (2- Packs) is powered by AX1800 Wi-Fi 6 and is the perfect solution for starting out in whole-home mesh networking or expanding your existing network. Simply add more COVR-X1870 Series Points throughout your home to create your own lag-free, super-fast, whole-home Wi-Fi 6 Mesh Network. Mesh that fits everyone's needs.

Reduce Buffering and Lag

Smart Steering technology steers you away from buffering and lag by automatically directing your device to the optimum wireless band, depending on your current network traffic. No more frustrating drop outs, lag or interruptions in your wireless connections.

More Coverage

The COVR-X1870 (2 Packs) can cover up to 510 sqm. You can also add extra COVR-X1870 Points to eliminate pesky Wi-Fi dead zones in houses of different sizes and designs.

One Seamless Network

With COVR, there's just one wireless network name (SSID) for your entire home, no matter where you are. You'll never have to remember usernames and passwords for different networks in your home ever again.

4 Gigabit LAN Ports

Connects more wired devices.

Benefits/Advantages of a Wi-Fi Mesh Network:

Better Coverage

A mesh network is a group of internet hubs working together. Using a network instead of a single point of access, you do not have to rely on just one router for your Wi-Fi. They work together to ensure a strong wireless connection in every nook and cranny of your home.

Minimizing Dead Zones

Traditional routers tend to lose Wi-Fi signal the further away you are. A mesh network eliminates those dead zones. The stations piggyback on one another, so it acts like a continuous link no matter where you are in your home.

Smartphone Management

Most mesh systems include a user-friendly smartphone app. The app helps you understand the ins and outs of your system. You can manage it at your fingertips.

Customized Size

Your mesh network can be any size you would like. Each hub is a single piece in the entire network. So, if you feel you need another module, you can add one. If you feel you have too many, you can take one away. There is minimal setup, and it is not difficult to add or take away as many hubs as you need..

Easy Configuration

A mesh network works on many nodes in one network. Since this is true, you would imagine it would be difficult to configure them all. However, you do not have to manually set up and configure each satellite hub in your system. They easily do it themselves.

Less Connection Failure

Mesh networks are extremely resilient. It is constantly "discovering" path changes and any rerouting. The nodes find this information and relay it to the other nodes. This means if there is a failure somewhere in the system, the other pieces will pick it up and find a fix on their own.

The Future of Wi-Fi

The future is unstoppable. Your Wi-Fi should be too.

From IoT gadgets constantly receiving and sending data 24/7, to personal devices running multiple data intensive applications all at the same time, your future smart home will be one incredibly device-intensive, Wi-Fi-hungry beast.

Feed the beast with Wi-Fi 6.

Wi-Fi 6 is the next-generation Wi-Fi technology that offers more capacity and bandwidth to support more devices at once. It's the quantum leap in Wi-Fi network efficiency you've been waiting for. Perfect for today's (and tomorrow's) high demand, highly dense IoT home.

Don't let device-intensive deployments get in the way of your Wi-Fi experience.

Get an AX Router.

QUICK TIP: Dual and Tri-Band Wi-Fi

AC Wi-Fi is becoming a necessity as the number of devices streaming audio and video in the home is rapidly increasing.

Consider upgrading to a D-Link Wireless AC Dual or Tri-Band Router for less interference and faster speeds for everyone in your home to enjoy.

Eliminate Wi-Fi Dead Spots with D-Link Power Line and Range Extenders

The affordable and compact way to **extend your Wi-Fi coverage** for improved connectivity throughout your home.

UNDERSTANDING DIFFERENT OPERATION MODES

Access Point Mode

- ▶ Access Point mode allows the device to act as a central hub for wireless users, giving them access to your existing wired network.
- ▶ Connect the DAP-1665 or DAP-1360 to an existing wired network and easily enable wireless connectivity in your home.
- ▶ Use your new wireless network to stream HD multimedia content, play multi-player games, or make Internet phone calls (VoIP).

Range Extender Mode

- ▶ Range Extender mode extends wireless coverage of your existing wireless network to cover "dead" spots and reach further into your home or office.
- ▶ Ideal for customers with bigger homes or offices, environments where structural interferences occur with wireless signals (i.e. brick homes), and double storey homes that have longer distances to cover.

High-Speed Wi-Fi 6 Throughout Your Home

Exceptional Capacity

Up to 4x greater capacity than 11ac, so more devices can connect at once

Next-gen Speed and Range

Get 5 GHz band speeds up to 38% faster than the equivalent 11ac, for better 4K streaming, gaming and downloading

Made for Smart Homes

Up to 4 simultaneous streams deliver data to more devices with less latency

Unprecedented Efficiency

Target Wake Time (TWT) helps reduce battery consumption for smart home devices

Strong

Weak

Expand Wi-Fi 6 coverage to every corner so you can watch 4K movies, play games, or work remotely wherever you may be. Boost your Wi-Fi 6 coverage and rid your home of spotty signal for high-speed Wi-Fi 6 on all your connected devices.

Connects You to the Strongest Wi-Fi Signal

Roam your home and stay connected with one network name. D-Link Wi-Fi Mesh makes it easy to mix-and-match the DAP-X1870 with compatible D-Link routers for your own customized advanced mesh network.

Don't have a D-Link Mesh Router? The DAP-X1870 also supports 802.11k/v standard for Mesh Smart Roaming so you can use it with any brand of router or ISP Wi-Fi gateway and automatically connect to the strongest Wi-Fi signal as you move around from the bedroom to the kitchen and even the backyard.

Smarter WiFi with a Single Network

Fast, reliable roaming for a seamless connection while you move around your home. No hassle with switching SSIDs (network name). The WiFi extender uses the same SSID and automatically switch intelligently.

- ▶ Multiple operation mode: Range Extender or Access Point
- ▶ Smart Signal LEDs
- ▶ WiFi MESH with 802.11 k/v Router
- ▶ Auto firmware upgrade

AC 1200
DUAL BAND

DAP-1620

Wireless AC1200 WiFi Range Extender

- ▶ Dual Band Wireless AC1200 Technology
- ▶ Gigabit LAN Port
- ▶ High Power Wireless Performance with 2 x external antennas
- ▶ Universal Range Extender works with any brand device
- ▶ Portable and Easy to Use
- ▶ WiFi MESH with 802.11 k/v Router

AC 1200
DUAL BAND

DAP-1610

Wireless AC1200 Dual Band Range Extender

- ▶ Wireless AC1200 Technology
- ▶ Universal Range Extender works with any brand device
- ▶ 10/100 Mbps Ethernet LAN port
- ▶ Wall plug design for more convenience
- ▶ One touch configuration
- ▶ Multiple operation mode: Range Extender or Access Point
- ▶ Signal indicator LED
- ▶ WiFi MESH with 802.11 k/v Router

AC 1200
DUAL BAND

DAP-1665

Wireless AC1200 Dual Band Access Point

- ▶ Dual Band Wireless AC1200 Technology
- ▶ Multiple Operation Modes: AP/Range Extender, Bridge, Bridge with Access Point, Wireless Client
- ▶ Gigabit LAN Port
- ▶ High Power Wireless Performance with 2 x external antennas
- ▶ Universal Range Extender works with any brand device
- ▶ Kensington Lock Support

n 300

DAP-1325

Wireless N300 Range Extender

- ▶ Wireless N300 Technology
- ▶ Universal Range Extender works with any brand device
- ▶ 10/100 Mbps Ethernet LAN port
- ▶ Wall plug design for more convenience
- ▶ One touch configuration
- ▶ Multiple operation mode: Range Extender or Access Point
- ▶ Smart Signal LEDs
- ▶ WiFi MESH with 802.11 k/v Router

n 300

DAP-1360

Wireless N300 Access Point

- ▶ Wireless N300 Technology
- ▶ Multiple Operation Modes: AP/Range Extender, Bridge, Bridge with Access Point, Wireless Client, WISP Client Router, WISP Repeater
- ▶ 10/100 Ethernet LAN Port
- ▶ Universal Range Extender works with any brand device

DSL-G2452DG

Dual Band Wireless AC1200 VDSL2 / ADSL2+ Modem Gigabit Router with VOIP

- Excellent Throughput for VDSL
- Ready for Fiber Upgrade (Gigabit WAN)
- In-Built 2 FXS phone ports for VoIP

DSL-G2452DG

Dual Band Wireless AC1200 Gigabit VDSL2/ADSL 2+ 4-Port Ethernet IAD

- ▶ Dual Band Wireless AC1200 Technology
- ▶ Integrated VDSL2 / ADSL2+ Modem
- ▶ Dedicated Gigabit WAN port
- ▶ 4 x Gigabit Ethernet LAN Ports
- ▶ WAN Failure (3G/4G, WAN, ADSL/VDSL) WAN → 3G/4G or VDSL → 3G/4G
- ▶ USB 2.0 Port for 3G/4G USB dongle* or storage file sharing
- ▶ 2 x FX S RJ-11 Ports for VOIP

AX3000 WI-FI 6 PCIe ADAPTER with Bluetooth® 5.1

Upgrade your PC to Next Generation
Wi-Fi 6 and Bluetooth® 5.1

LOWER LATENCY
Reduces lag for better gaming or VR experiences¹

NEXT GEN SPEED & RANGE
AX3000 speeds up to 2402Mbps (5GHz), 600Mbps (2.4GHz)

UNPRECEDENTED EFFICIENCY
Higher throughput, more efficient transmission

BACKWARDS COMPATIBLE
Supports all existing Wi-Fi routers and gateways

DUAL BAND

DWA-X582

AX3000 Wi-Fi 6 PCIe Adapter with Bluetooth

- ▶ Dual Band AX3000 PCI Express Adapter
- ▶ Backwards compatible with IEEE 802.11a/b/g/n devices
- ▶ Supports the latest Wi-Fi security with 128 bit encryption
- ▶ Bluetooth 5.1 connectivity
- ▶ Connect to any PCIe slot in your computer, whether it is a x1, x4, x8, or x16 slot
- ▶ Easy to setup and use

DWA-582

Wireless AC1200 Dual Band PCIe Desktop Adapter

- ▶ Dual Band Wireless AC1200 Technology
- ▶ Backwards compatible with IEEE 802.11a/b/g/n devices
- ▶ 2 x 4.5dBi External Antennas
- ▶ PCI Express x1, x4, x8, or x16 support
- ▶ Low Profile Bracket included

DWA-172

Wireless AC600 High Gain Dual Band USB Adapter

- ▶ Dual Band Wireless AC600 Technology
- ▶ Backwards compatible with IEEE 802.11a/b/g/n devices
- ▶ 1 x 3dBi External Antenna
- ▶ USB 2.0 Connector
- ▶ Wi-Fi Protected Setup (WPS) Push Button for easy connection to a Wi-Fi network
- ▶ Works with Windows and Mac OS

DWA-171

Wireless AC600 Dual Band Nano USB Adapter

- ▶ Dual Band Wireless AC600 Technology
- ▶ Backwards compatible with IEEE 802.11a/b/g/n devices
- ▶ USB 2.0 Connector
- ▶ Wi-Fi Protected Setup (WPS) Push Button for easy connection to a Wi-Fi network
- ▶ Works with Windows and Mac OS

DWA-131

Wireless N300 Nano USB Adapter

- ▶ Wireless N300 Technology
- ▶ Backwards compatible with IEEE 802.11b/g/n devices
- ▶ USB 2.0 Connector
- ▶ Wi-Fi Protected Setup (WPS) Push Button for easy connection to a Wi-Fi network
- ▶ Works with Windows and Mac OS

DWA-123

Wireless N150 USB Adapter

- ▶ Wireless N150 Technology
- ▶ Backwards compatible with IEEE 802.11b/g/n devices
- ▶ USB 2.0 Connector
- ▶ Wi-Fi Protected Setup (WPS) Push Button for easy connection to a Wi-Fi network
- ▶ Works with Windows and Mac OS

DWA-121

Wireless N150 Pico USB Adapter

- ▶ Wireless N150 Technology
- ▶ Backwards compatible with IEEE 802.11b/g/n devices
- ▶ USB 2.0 Connector
- ▶ Ultra mini size
- ▶ Works with Windows and Mac OS

250M Long Range PoE Switch

Built for your Need

Robust and cost-effective PoE solution to provide power for your PoE powered devices such as IP cameras, CCTV, VoIP, AP etc

- 
6KV
 Lighting Protection
- 
250M
 Transmission Distance
- 
QoS
 Switch Video Streaming
- 
INTELLIGENT PD
 Switch Automatic Detection Power Status/Recover
- 
VLAN
 Switch
- 
POE+
 IEEE802.3af/at STANDARDS

Up to 250m PoE and Data Transmission

Equipped with PoE extend technology, these PoE Switches have the capability to supply 802.3af/at PoE up to 250m with data transmission. Cost saving for long distance solution.

* Extend mode enabled, supported data rate up to 10Mbps with Cat 5E cable and above

6KV Surge Protection

D-Link 250M is enhanced with 6KV surge protection Effectively guard equipment from lighting damage especially if use on AP/IP camera install outdoor or at higher position

Enhanced with VLAN Function

With a flick of button, Isolate the downlink port to each other can effectively suppress network storms and improve network performance

Enhanced with Video QoS

Improve the Video Packet Priority and create high priority for video streaming, perfect solution for IP camera/CCTV

Robust deployment for all occasion

Hotel

Home

Restaurant

Office

Store

Factory

Switches D-Link PoE Switches

D-Link offer wide variety of PoE switches ranging from standard to Long range PoE and PoE with high power budget to suit each home/SOHO and SMB need.

Long Range PoE provide a break through in technology to supply PoE power up to 250m which provide the best cost-effective powered solution to CCTV, IP Camera and VoIP devices.

Featuring **802.3az Energy Efficient Ethernet**, which saves energy and reduces heat automatically without sacrificing performance or functionality, D-Link switches optimizes power usage for each part by the length of cable connected to it, and put the ports that are inactive and do not have a device attached in standby mode, saving a substantial amount of power.

- ▶ Smart Features: Extend, VLAN, QoS and PoE
- ▶ Plug & Play installation

DES-1008PA

8-Port Fast Ethernet Desktop Switch with 4 PoE Ports

- ▶ 8 Fast Ethernet ports with 4 PoE ports
- ▶ 52Watts PoE power budget
- ▶ Compact size
- ▶ Robust metal housing
- ▶ Fanless design for silent operation
- ▶ Plug-and-play installation

DES-1018MP

18-Port Fast Ethernet Unmanaged PoE Switch with 2 1000BASE-T/SFP Combo Port

- ▶ Allows for flexible installation for wireless access points or network video cameras
- ▶ 16 Fast Ethernet PoE Ports and 2 Gigabit uplink ports
- ▶ Reliable PoE connections with enhanced surge protection
- ▶ Compliant with IEEE 802.3af
- ▶ Up to 15.4W per PoE port with a Max PoE budget of up to 245.4w
- ▶ Energy saving features such as a smart fan and compliance with IEEE 802.3az

DGS-1005P

5-Port Gigabit Ethernet Desktop Switch with 4 PoE Port

- ▶ 4 Gigabit PoE Port
- ▶ 1 Gigabit Uplink Port
- ▶ 802.3az Energy-Efficient-Ethernet (EEE)
- ▶ Support 802.3af/at up to 30W per port
- ▶ PoE Budget 60W
- ▶ Metal Housing

DGS-1008P

8-Port Gigabit Ethernet Desktop Switch with 4 PoE Ports

- ▶ 8 x Gigabit Ethernet ports (Port 1-4 supports 802.3at PoE+)
- ▶ 802.3az Energy-Efficient Ethernet (EEE)
- ▶ PoE Power Budget: 68W
- ▶ Metal Housing
- ▶ D-Link Green power saving features

DGS-1008MP

8-Port Gigabit PoE Desktop Switch

- ▶ 8 x Gigabit PoE ports (Port 1-8 supports 802.3at PoE+)
- ▶ 802.3az Energy-Efficient Ethernet (EEE)
- ▶ PoE Power Budget: 140W to 125W
- ▶ Metal Housing
- ▶ D-Link Green power saving features

DGS-1026MP

24-Port Gigabit Ethernet PoE Switch with 2 Combo Uplink Port

- ▶ 24 Gigabit PoE Port
- ▶ 2 Gigabit Combo Uplink Port (Ethernet/SFP)
- ▶ 802.3az Energy-Efficient-Ethernet (EEE)
- ▶ Support 802.3af/at up to 30W per port
- ▶ PoE Budget 370W
- ▶ Metal Housing
- ▶ Mount Rack design

DGS-1005A

5-Port Gigabit Ethernet Desktop Switch

- ▶ 5 x Gigabit Ethernet ports
- ▶ 802.3az Energy-Efficient Ethernet (EEE)
- ▶ Compact Housing
- ▶ Fanless design for quiet operation
- ▶ D-Link Green power saving features

DGS-1005C

5-Port Gigabit Ethernet Desktop Switch

- ▶ 5 x Gigabit Ethernet ports
- ▶ 802.3az Energy-Efficient Ethernet (EEE)
- ▶ Compact Housing
- ▶ Fanless design for quiet operation

Network Interface Card

The Network Interface Card (NIC) allows computers to communicate over a computer network via UTP Cables. It provides 100Mbps, 1Gbps and 10Gbps connectivity for data transmission in a network.

DGE-560T PCIe Gigabit Ethernet Adapter

- ▶ 10/100/1000Mbps
- ▶ PCI Express v1.1
- ▶ "Hot-Plug" Support
- ▶ 802.1p Priority Encoding, 801.1Q VLAN Tagging, 9KB Jumbo Frame
- ▶ Wake-on-LAN, Remote Boot (PXE/RPL)
- ▶ IEEE 802.3az Energy Efficient Ethernet (EEE) power saving features
- ▶ Low Profile Bracket Included

DGE-528T PCI Gigabit Ethernet Adapter

- ▶ 10/100/1000Mbps
- ▶ PCI local bus 2.3
- ▶ 802.1p Priority Encoding, 802.1Q VLAN Tagging, 7KB Jumbo Frame
- ▶ Wake-on-LAN, Remote Boot (PXE/RPL)
- ▶ Power saving features
- ▶ Low Profile Bracket Included

Awards and Accolades - Best IP Camera Brand

Voted 4 Times Best IP Camera Brand Award, D-Link has a wide range of IP cameras that you can choose and select which one is suitable for your needs. Most of the D-Link IP cameras supports cloud recording and local recording via SD card which is up to 256GB. D-Link IP cameras also supports 2-way audio and works with Amazon Alexa and Google Assistant. Some IP cameras support AI-based IVA which helps to detect motion that really matters.

Automate Your Home with mydlink™ Connected Home

Works with mydlink® Smart Devices

DCH-G022 mydlink™ Connected Home Hub

Product Highlights

Works with mydlink Smart Home devices

Wirelessly pair mydlink Z-Wave devices with the push of a button

Get your mydlink and Z-Wave devices talking to each other

DCH-Z112 mydlink™ Z-Wave Door/Window Sensor

Product Highlights

Attach to a door or window in a key area of your house, and switch your lights or cameras on or off whenever it is opened or closed

Connect to your mydlink Connected Home Z-Wave gateway using D-Link's unique protocol, ensuring optimal compatibility

Use the intuitive mydlink Home app for your smartphone or tablet to get your home automated in a matter of minutes

DCH-Z122 mydlink™ Z-Wave Motion Sensor

Product Highlights

Attach to a wall in a key area of your house, and switch on your lights or mydlink-enabled cameras whenever someone is nearby

Connect to your mydlink Connected Home Z-Wave gateway using D-Link's unique protocol, ensuring optimal compatibility

Use the intuitive mydlink Home app for your tablet or smartphone to get your home automated in a matter of minutes

DCH-Z510 mydlink™ Z-Wave Home Siren

Product Highlights

Attach to a wall and power-up the siren, with 6 different sound built-in. It will give the user a loud 110dB siren when the contact sensor or motion sensor is triggered.

Connect to your mydlink Connected Home Z-Wave gateway using D-Link's unique protocol, ensuring optimal compatibility

Use the intuitive mydlink Home app for your smartphone or tablet to get your home automated in a matter of minutes

Mobile Broadband

D-Link provides a range of compact designed, plug and play mobile broadband routers that fit easily in your pocket or purse, as well as a range of high-power devices for your home or business application. You can leave your mobile device chargers at home, as some of our portable routers can also be used as a USB charger to power your gadgets, including power-hungry devices like an iPad. You can setup your own wireless network on the go, or share pictures, music, video and files easily with the mydlink™ SharePort app.

USB-C to HDMI Adapter

- » 4K HDMI
- » Plug and Play
- » Small and Compact
- » Support Windows OS/Mac OS/Chrome OS

DUB-E250

USB-C to 2.5G Ethernet Adapter

- » 2.5G Ethernet Connectivity
- » USB-C Connector
- » Auto Speed Detection
- » Supports Crossover Detection
- » Supports Full-Duplex Mode
- » Two LED indicators

DUB-E130

USB-C to Gigabit Ethernet Adapter

- » Gigabit LAN port
- » Plug and Play
- » Dynamic Power Management – Power Saving
- » Support Windows OS/Mac OS

DUB-1312

USB 3.0 to Gigabit Ethernet Adapter

- » USB 3.0 Connector
- » Gigabit Ethernet Port
- » Achieve transfer speeds of up to 1 Gbps
- » Especially useful for battery-powered notebook and ultrabook computers
- » Small and compact design makes it easy to take with you wherever you go
- » Simply plug in, install the included software and you're ready to go
- » Works on Windows, Mac and Linux PCs

DUB-1341

4-Port SuperSpeed USB 3.0 Portable Hub

- » Four USB 3.0 Certified ports
- » Backwards compatible with USB 2.0 devices
- » Hot-Swappable Plug and Play
- » Sleek, compact design
- » USB plug clips onto its body, saving more space
- » Works on Windows, Mac and Linux PCs

DUB-H7

7-Port USB 2.0 Hub with 2 Fast Charge Ports

- » Seven USB 2.0 ports
- » Up to 1.2A of power on 2 ports allows for charging of high capacity devices like tablets
- » Backwards compatible with USB 1.1 devices
- » Works on Windows, Mac and Linux PCs

DUB-H4

4-Port USB 2.0 Hub with 1 Fast Charge Port

- » Four USB 2.0 ports
- » Sleek, compact design
- » Works on Windows, Mac and Linux PCs
- » Fast Charge Mode:
 - 0.5A each for white ports
 - 2A on Fast Charge Port

D-Link Apps

Discover which mydlink™ app is right for you.
